

YOGESH MEHRA

Java Full Stack Developer | Java 17 | Spring Boot | Microservices | React.js | REST APIs | Kafka | Redis | Immediate Joiner

India | +91-9675580388 | yogeshmehra.mehra1@gmail.com | github.com/YogeshMehra1 | linkedin.com/in/yogesh-mehra-dev | [Portfolio](#)

SUMMARY

Java Full Stack Developer with 3.8 years of experience developing backend services and web applications using Java 17, Spring Boot, REST APIs, Spring Data JPA, Hibernate, and MySQL. Experienced in building and enhancing microservices-based applications using Spring Cloud, API Gateway, Eureka, OpenFeign, and Resilience4j. Hands-on experience with Apache Kafka, Redis, Spring Security, JWT, React.js, Angular, AWS, Docker, and CI/CD. Experienced in developing REST APIs, implementing business logic, validation, exception handling, database operations, and integrating frontend applications with backend services.

TECHNICAL SKILLS

Languages & Core: Java 17, JavaScript, TypeScript, SQL, DSA, OOP, Multithreading, System Design, Design Patterns

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs

Microservices: Spring Cloud, API Gateway, Eureka, OpenFeign, Resilience4j

Database & Messaging: MySQL, Redis, Apache Kafka

Security: Spring Security, JWT, Role-Based Authorization

Frontend: React.js, Angular, HTML5, CSS3

Cloud & DevOps: AWS S3, AWS EC2, Docker, Git, GitHub Actions, CI/CD

Testing & Tools: JUnit, Mockito, Postman, Swagger/OpenAPI, Jira

AI Coding Tools: GitHub Copilot, Cursor AI, ChatGPT, Spring AI

PROFESSIONAL EXPERIENCE

Associate Consultant — Java Full Stack Developer, Infosys Limited, Pune Nov 2025 – Mar 2026

Project: Healthcare Management Platform

Tech Stack: Java 17, Spring Boot, Spring Cloud, REST APIs, Spring Data JPA, MySQL, Kafka, Redis, Docker, AWS, React.js

- Contributed to an existing microservices-based healthcare platform using Java and Spring Boot, covering patient management, provider management and appointment workflows.
- Developed and enhanced REST APIs for healthcare-related backend workflows, handling request validation, business logic, exception handling and database operations via Spring Data JPA and MySQL.
- Worked with existing Spring Cloud components including API Gateway, Eureka and OpenFeign for service-to-service communication, and Resilience4j for fault tolerance.
- Used Apache Kafka for asynchronous notification events and Redis for caching, and worked with Docker and AWS to support containerized builds and application deployment.
- Integrated React.js components with backend REST APIs, and investigated/tested defects using Postman and Swagger within Jira-based Agile development.

Junior Software Developer, Haryana Knowledge Corporation Limited, Panchkula, Haryana Jul 2022 – Oct 2025

Project 1: Online Recruitment

Tech Stack: Java, Spring Boot, REST APIs, MySQL, JPA/Hibernate, Angular, AWS S3, AWS EC2, AWS SNS

- Developed Java/Spring Boot backend modules for candidate registration, application submission and admit-card workflows, implementing validation and business logic with MySQL/JPA-Hibernate persistence.
- Integrated a third-party payment gateway for online application/payment processing, and implemented OTP-based verification with email/AWS SNS notification workflows.
- Developed PDF and Excel report/document generation for application and examination-related workflows.
- Used AWS S3 and EC2 for document/file storage and application hosting, and developed Angular modules integrated with backend REST APIs.
- Wrote unit/integration tests using JUnit and Mockito and supported production issue investigation during examination cycles.

Project 2: Online Transfer System

Tech Stack: Java, Spring Boot, REST APIs, MySQL, Spring Security, JWT, React.js, Swagger/OpenAPI, Postman

- Developed and enhanced REST APIs using Java and Spring Boot for application and document-verification workflows, including request validation and exception handling.
- Implemented Spring Security and JWT-based authentication for secured application access and role-based authorization.
- Handled service-layer business logic and database operations to support document verification workflows.
- Refactored existing backend logic using Java Streams and Lambda expressions to improve code modularity and reduce duplication.
- Developed React.js components integrated with backend REST APIs, documented/tested endpoints using Swagger/OpenAPI and Postman, and supported debugging and issue resolution.

PROJECTS

Resume Analyzer AI (Personal Project) — Spring Boot, Spring AI, Google Gemini, Apache Tika

- Built a Spring Boot app that extracts resume text via Apache Tika and uses Spring AI with Google Gemini to generate an ATS score and improvement suggestions.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

Uttarakhand Technical University | 2016 – 2020
